RIIMPO324F Conduct civil construction grader operations

Completing RIIMPO324F Conduct Civil Construction Grader Operations gives you a nationally recognised qualification that will give you the skills to operate this machinery.

A Grader is a self-propelled vehicle that is used to move and place construction materials using a centrally mounted blade. The materials that a civil construction grader will commonly work with include clay, mud, topsoil and organic materials, stones, rocks and gravel, silts and sand, and construction site materials such as bituminous mixes and waste materials

Mining qualification also available RIIMPO310F Conduct Grader Operations. On successful completion of the course, participants will receive a nationally recognised Statement of Attainment in either, RIIMPO324F Conduct civil construction grader operations or RIIMPO310F Conduct grader operations, a competency card is also available.
